

Mandatory Config JSON - Quick Guide

This quick guide has been consolidated into the SDD documentation.

Use the maintained documentation here:

- [docs/specs/02-dynamic-mandatory-engine.md](#) for overview, runtime behavior, form integration, JSON configuration, copy/paste examples, validation, and troubleshooting.

The active runtime configuration is stored in Dynamics:

```
Table:  ambcust_location  
Field:  mhwrmb_mandatoryconfigjson
```

The local JSON files under [WebResources/src/config](#) are examples only.
